### EXPERIENCE

#### PepsiCo do Brasil

##### Intern — Product Engineering (R&D)

Jan 2024 – Jul 2024

Sorocaba, Brazil

- Cut material waste by **44%** and accelerated project-label generation by **75%** by designing, end to end, an inventory management system that integrated VBA and SAP and improved inventory visibility by project category.
- Eliminated manual product-requirement lookups by building a VBA/Excel automation that pulled data directly from SAP, standardizing the process into a single, auditable flow.

#### 4R Tecnologia da Informação

##### Intern — Software Development

May 2022 – Jan 2024

Sorocaba, Brazil

- Improved the efficiency of sensitive-data operations by **~20%** by developing, end to end, access-control and payroll systems in Visual Basic 6 + SQL Server.
- Reduced development time for new features by **~15%** by building interfaces and business logic in GeneXus (low-code), creating reusable components across projects.

#### Escritório Ambrozio

##### Administrative Assistant

Mar 2019 – Jan 2021

Sorocaba, Brazil

- Coordinated client communication and the flow of information between internal teams and external stakeholders, responding to requests and keeping all parties aligned.
- Ensured accuracy and on-time delivery in the assessment and processing of taxes and fees, supporting accounting operations, document management, and the classification of legal documents.

### KEY PROJECT

#### Final-Year Capstone Project (Thesis)

##### Intelligent Agent with RAG for HR Data Access Management

- Reduced operational demand by **34%** by developing an intelligent agent based on Retrieval-Augmented Generation (RAG) that automated controlled access to Human Resources data.
- Overcame hallucination, context-window limits, and instruction-sensitivity challenges through query-workflow optimization and prompt engineering, demonstrating the solution's practical applicability on real data.

### EDUCATION

#### Bachelor's in Computer Engineering — Dual Degree

##### Universitat de Lleida

Sep 2024 – Jul 2025

Lleida, Spain

#### Bachelor's in Computer Engineering

##### Centro Universitário FACENS

Feb 2020 – Jul 2025

Sorocaba, Brazil

- Participated in the FACENS Programming Marathon (2021).

#### Technical Degree in Business Administration

##### ETEC de Porto Feliz

Jul 2018 – Dec 2019

Porto Feliz, Brazil

### SUMMARY

Computer Engineer (dual Brazil–EU degree) with a track record of measurable efficiency: automations that cut material waste by 44% and an AI agent built on RAG that reduced operational demand by 34%. Driven by ownership and a strong bias for execution, I am seeking a high-growth environment where I can turn business problems into results.

### CERTIFICATIONS

#### Michigan ECPE — Level C2

Michigan Language Assessment

### TRAINING & COURSES

#### Data Structures and Algorithms in Python

Udemy

#### ECPE C2

Fisk

### LANGUAGES

#### English

• • • •

Fluent

#### Spanish

• • •

Advanced

#### Catalan

• •

Intermediate

### SKILLS

#### AI & Automation

RAG, prompt engineering, process automation (VBA/SAP), data analysis.

#### Technologies

JavaScript, TypeScript, Java, Kotlin, Python, SQL Server, MongoDB, Supabase, Firebase, VB6, React, Next.js, Flask.

#### Tools

SAP, Docker, Android Studio, Unity.
